

Practical # 13

Write a program using nested for loop to print the following output .

```
1  #include <stdio.h>
2
3  int main() {
4      int i, j;
5
6      for (i = 1; i <= 5; i++) {
7          for (j = 1; j <= i; j++) {
8              printf("* ");
9          }
10         printf("\n");
11     }
12
13     return 0;
14 }
```

```
*
* *
* * *
* * * *
* * * * *
```

Algorithm:

1. Start
2. Declare integer variables i and j
3. Use an outer loop i from 1 to 5 for rows
4. Use an inner loop j from 1 to i for columns
5. In the inner loop, print *
6. After each row, print a newline \n
7. End
