

Practical # 9

Write a program that reads your name and prints that name 10 times.

```
1  #include <stdio.h>
2
3  int main() {
4      char name[50];
5      int i;
6
7      printf("Enter your name: ");
8      scanf("%s", name);
9
10     for (i = 1; i <= 10; i++) {
11         printf("%s\n", name);
12     }
13
14     return 0;
15 }
```

```
Enter your name: Ahmed
Ahmed
Ahmed
Ahmed
Ahmed
Ahmed
Ahmed
Ahmed
Ahmed
Ahmed
Ahmed
```

Algorithm:

1. Start
2. Declare a character array to store the name
3. Declare an integer variable i
4. Read the name from the user
5. Use a loop that runs from 1 to 10
6. Print the name in each iteration
7. End
